

How to sell e-scooters safely

Things to remember to discuss with customers...

-  E-scooters cannot legally be used on the road, cycle lanes or on the pavement. They are **only** permitted on private land.
-  Police can seize an E-Scooter, if it's not being used on private land and a fine can also be issued.
-  There is no legal requirement for helmets to be worn, however we highly recommend one due to the speeds that can be reached.
-  There are insurance policies available and although currently it's not required by law, it is highly recommend.
